**FIRE ACADEMY**

IFSI serves as the State Fire Academy. The seven-week Basic Firefighter / NFPA Firefighter I Academy gives new firefighters the practical and cognitive training needed to operate safely and effectively on the fireground. The IFSI Fire Academy focuses on an intense hands-on approach to firefighting, which promotes both skill competency and an understanding of the fireground.

**BASIC OPERATIONS FIREFIGHTER / NFPA FIREFIGHTER I BLENDED**

The Basic Operations Firefighter / NFPA Firefighter I Blended course gives firefighters the practical and cognitive training needed to operate safely on the fireground. The 18-week course is delivered through a unique and flexible schedule format featuring 9 practical weekend sessions and online learning. Students complete the coursework through an instructor supported online classroom. Practical weekend sessions are offered simultaneously across the state, eliminating a need for students to travel long distances to complete the training.

**NATIONAL INCIDENT MANAGEMENT SYSTEM (NIMS)**

NIMS offers incident management to organizations throughout the State of Illinois. The program focuses on advanced training for the eight command and general staff positions and the development of incident action plans to support preparedness, response and recovery activities at the local and state level.

**LEADERSHIP DEVELOPMENT AND DECISION MAKING (LDDM)**

The LDDM program is designed to be “cradle-to-grave” fire service leadership development/decision-making training and education continuum that has consistent themes, priorities, and lines of education in order to institutionalize the highest-quality leadership in the fire service. Each level within the LDDM Program is provided relevant opportunities for development, which are specific to their rank across seven common Lines of Education (LOE).

**RESILIENCE**

The purpose of the IFSI Resilience Project is to positively impact the health and resilience of every first responder who participates in classes.

Courses offered are designed to provide support for first responders at any stage of their career with the necessary tools to respond in a resilient way to the stressors that come with the job as well as stress from off the job. Focusing on cutting-edge science, students will see how stress can damage the brain and body, and also how to recover from the damage.
